OK, thanks Forrest.

One thing to note, and I confirmed with Aileen Molloy (Tt's lead staff on this TO), is Ben Jessup from Tt will be involved in the project. However, our communication with Tt should always go either through Aileen or with a cc to Aileen. I prefer that Katharine and I are the main people in contact with Tt, as the TOM and ATOM on the Task Order, but neither of us want to hold up work. So let's all keep each other cc'd and in the loop re: all communication with Tt on this project.

The main reason behind this: we're managing Tt's assistance to 11 states through this TO, and the best way to control costs and ensure that all work can be done is to go through the established contract channels. However, Katharine and I realize that your coordination with the state and knowing the ins and outs of what Tt will need to do to fully support the state's desired outcome is invaluable - so we really need and appreciate your involvement and energy around this project!

Thanks,  
Katie

Subject: New Mexico Nutrient Technical Direction

Katie and others -

I was hoping to schedule a meeting with Ben Jessup, Tetra Tech, to get the nutrient project going but he is on vacation and will not be returning to the office until August 13th. So upon his return to the office, I will work with you Katie to get a call scheduled the week of August 13th.

Talk with you then.
